

1. A. 23                         5. A. 420                         9. A. 270  
B. 45                             B.  $\frac{25}{19}$                              B. (5, 3) and  
C. 26                             C.  $9x+11$                              (20, 19)  
D. 11                             D. 26                                     C.  $\pm 3$   
  
2. A. 20                             10. A.  $\frac{1}{20}$   
B. 2                                     B. 18  
C.  $y = -x + 8$                      C.  $\frac{\pi}{4}$   
D. 57                                     D. 11  
  
3. A.  $3\pi$                              D. 3600  
B. 40                                       
C. 3                                       
D. 3                                     7. A.  $\frac{23}{64}$   
  
4. A.  $6 + \sqrt{26}$                      C.  $-\frac{19}{22}$   
B.  $1 + \sin A \cos A$  or  
 $1 + \frac{1}{2} \sin \frac{A}{2}$                      D. 100  
C.  $-\frac{20}{y^3}$  or  $-20y^{-3}$                      8. A. 89  
D. 0                                     B.  $3M + 2P - N$   
   C. 630  
   D. 84
